Cloud Based AP Automation Solution

ancoraDocs was developed to bring simplicity to a technology that historically has been complex, over-priced and difficult to configure, install, use and maintain.

The industries only true multi-tenant SaaS AP Advanced Data Capture solution

♦ **All clients are 100% web based with a zero footprint install**

♦ **All customers data is in a separate database and separate operating environment**

♦ **One customers processing peaks do not effect other customers performance**

♦ **Document classification eliminates separator sheets between invoices when scanning**

Cloud vs On-Premise Deployment

	Cloud	On-Premise
COST	Payments are based on a monthly subscription fee—monthly expense	All hardware and software cost are paid up-front—capital expense
IMPLEMENTATION	Hardware and software are installed in the cloud, no involvement by customer	All hardware and software are purchased and installed by customer
SECURITY & BACKUP	All security and data backup are provided automatically by software provider	The company is required to provide access security and data backups
SUPPORT	Maintenance and technical support are included in the monthly subscription fee	Maintenance and technical support is an additional annual cost in addition to server admin cost
UPGRADES	Hardware and software upgrades are included in the monthly subscription fee	The company is responsible for the purchase and install of upgrades
GROWTH	Growth is handled by the software provider	As the company grows it is their responsibility to purchase/install additional hardware and software
