

# Why ancoraDocs?

**ancoraDocs was developed to bring simplicity to a technology that historically has been complex, over-priced, and difficult to configure, install, use and maintain**

## What makes ancoraDocs different?

- Semi-structured forms, such as invoices and PO's as well as structured and unstructured forms all in one solution.
- A robust patented classification and categorization engine leveraging artificial intelligence and neural networks eliminating the requirement for separator sheets in document prep, the software automatically separates your documents.
- Setup a new customer in hours, not days or weeks. A new customer can be processing invoices or forms the first day.
- Simple installation and setup making it easy to cost justify an advanced capture solution for SMB and enterprise customers.
- Available to deploy as a true multi-tenant cloud solution. All clients are 100% web based requiring a zero footprint install.
- Our machine learning algorithms provides automatic, self-learning for fast setup of previously unseen invoices to not only include summary data but line item detail too. All invoices are processed by the same verifier regardless if it is a new invoice or one that has previously been seen by the software.
- Our configurable design tool allows you to process any semi-structured or unstructured form the same way we process invoices. Data field labels can be created and configured for data element extraction
- Capture invoices or forms from any input device or location, scanner, multi-function device, network folder or email attachment as part of the base solution with support for 27 different languages.
- Our open architecture allows for easy integration with ERP's, ECM Solutions and other 3<sup>rd</sup> party applications via multiple built-in export options; CSV, XML and ODBC/JDBC.
- A VERY simple pricing and licensing model, all licenses include unlimited verify users and unlimited scan/import/export workstations. Our AP Invoice pricing includes two pages per invoice and we do not charge for attachments or supporting documents.
